## TCU Drug Screen II - Oklahoma Department of Mental Health ...

An anorectic or anorexic is a drug which reduces appetite, resulting in lower food consumption, leading to weight loss. By contrast, an appetite stimulant is referred to as orexigenic.

## Anorectic - Wikipedia

Overdose is a dangerous and deadly consequence of heroin use. A large dose of heroin depresses heart rate and breathing to such an extent that a user cannot survive without medical help.

Naloxone (e.g., Narcan®) is an opioid receptor antagonist medication that can eliminate all signs of opioid intoxication to reverse an opioid overdose.

## What can be done for a heroin overdose? | National ...

Research has shown that marijuana's negative effects on attention, memory, and learning can last for days or weeks after the acute effects of the drug wear off, depending on the person's history with the drug. 53 Consequently, someone who smokes marijuana daily may be functioning at a reduced intellectual level most or all of the time.

## How does marijuana use affect school, work, and social ...
