## an atlas of opossum pdf

Mammary gland A mammary gland is an exocrine gland in humans and other mammals that produces milk to feed young offspring. Mammals get their name from the Latin word mamma, "breast". The mammary

## Atlas Of Opossum Organogenesis Opossum Development - sono2014

The opossum is of interest because of its short gestation period (about 12.5 days) and the fact that it is born in a near embryonic state. Because of the abbreviated period of intrauterine development, the opossum is an accessible biomedical model with which to study the major events that occur during organ development without the complications of doing intrauterine manipulations necessary if ...
