The first relates to the overall architecture of the city's development program, and the following three relate to the different components of that architecture (the design, organization, and implementation components). In each section, we begin by summarizing our key findings to provide a rationale for the recommendations that follow.

Architecture as Stimulus for Growth and Economic Development in Nigeria . By J. A. Olanusi, D. O. Akingbohunbe & Muhammed Adamu . Joseph Ayo Babalola University, Nigeria . Abstract- Architecture and design constitute one of the major economic growth areas in any country. Nigeria increasingly needs to compete in knowledge, development and innovation. Such

## **Architecture as Stimulus for Growth and Economic ...**

Architecture is one of the most conspicuous forms of economic activity. It is predicted that the pattern of architectural resource intensity (the ratio of per-capita architectural resource consumption to per-capita income) will generally follow the same patterns as shown in Figure 1, 2, and 3. A country's economic development will necessitate more factories, office buildings, and residential ...
